

Table 1: Population variation in hatch success(mean percent) of unfertilized eggs for females from populations sampled in 1997.

| Population                    | mean (%) | Standard deviation | Range | N  |
|-------------------------------|----------|--------------------|-------|----|
| Population name1 <sup>T</sup> | 10       | 1                  | 0-50  | 10 |
| Population name2 <sup>T</sup> | 10       | 1                  | 0-50  | 10 |
| Population name3 <sup>T</sup> | 10       | 1                  | 0-50  | 10 |
| Population name4 <sup>P</sup> | 10       | 1                  | 0-50  | 10 |
| Population name5 <sup>P</sup> | 10       | 1                  | 0-50  | 10 |
| Population name6 <sup>P</sup> | 10       | 1                  | 0-50  | 10 |
| Population name7 <sup>L</sup> | 10       | 1                  | 0-50  | 10 |
| Population name8 <sup>L</sup> | 10       | 1                  | 0-50  | 10 |
| Population name9 <sup>L</sup> | 10       | 1                  | 0-50  | 10 |

<sup>T</sup> = temporary stream, <sup>P</sup> = permanent streams, <sup>L</sup> = lakes.
